YourWebGurus, LLC – Testimonials 2010/2011

"This has been a real find for our company. Our Consultant has produced real and sustainable results for our organization. He works independently without supervision on our part. He is timely with his analysis, reporting and results. The most profound praise I can think of is that he is clearly thinking of his clients, even when they are not thinking about him and it makes us feel confident and secure in his work."

"We have seen a good tick up in quote volume from your work. We do try to ask callin's how they hear about us and I am getting reports that many of them are from Google. Just looking at the numbers, we issued the highest number of quotes for a November ever so I would say what you are doing deserves some additional exposure. From a sales perspective in 2010, we had our second best year ever."

Martin King

Legacy Chiller Systems, Inc.

"Our campaign manager has been an excellent partner in helping us to achieve our goals for both search engine marketing and search engine optimization. In the past few months, hes done an excellent job of reducing our overall search engine marketing spend while also improving our overall click through and conversion rates. We also continue to experience significant improvements in our organic rankings. His work has freed up my time for other marketing initiatives that cannot be outsourced in the same way that these efforts could. We look forward to the continued improvements in our online marketing efforts through his help and expertise."

“Our campaign specialist exhibits a level of expertise and skill in the management and optimization of Google Adwords that reflects a true expert. He was able to construct and develop a program from the ground up that provided qualified leads to our practice. He also identified a methodology for producing low cost leads despite extremely high market ppc costs. We will likely be working with him in the future and would highly recommend his services.”
